What related courses have you taken previously?

What related courses do you expect to take concurrently?

What related courses do you expect to take after Math 101?

What would you especially like to get out of taking this course?

Please use a **1**, **2**, or an **x** to indicate your first, second, or impossible section choices:

_____ Wednesdays 4:00 – 5:00

_____ Wednesdays 7:00 – 8:00

How serious are you about taking this course?

Not very _____

Serious _____

Definite _____

(over)

If a visitor from another culture or planet asked you these questions, what would you say?

1. What is mathematics and why do we study it?
2. What are the differences between geometry, analysis, and algebra?
3. What is a mathematical proof and why is it important?
4. What do you like best about mathematics? What do you like least about it?
